

Learning is a journey to a new world, an adventure, an expedition.

The FH Kufstein Tirol accompanies its students on this expedition and helps them to reach the highest summits.

You have to do the walking part yourself.

Falko Miller, BSc, MA - Graduate Process Management Consultant
EnBW Energie Baden-Württemberg GmbH

ENERGY & SUSTAINABILITY MANAGEMENT* >> ENM

FULL-TIME

Expand your knowledge of international strategic management, sustainability, renewable energies, and innovative mobility concepts with our full-time master's program. Turn your vision of a sustainable future into a rewarding career!

As a graduate in business, social sciences or technology, you will expand your skills in strategic sustainability management with an international focus. Whether in a corporate environment or your own start-up, we offer project- and research-based learning for innovative solutions and leadership skills.

The Master's program focuses on the international and European perspective of energy and sustainability management. You will be provided with in-depth knowledge to develop innovative solutions for sustainability, environmental and climate protection. Key areas are sustainability assessment, strategic management and AI-driven data analysis. The master thesis encourages applied research. You will expand your networks through business evenings and projects. The program strengthens core competencies and promotes a holistic view of sustainability, which is essential for strategic planning in companies, public institutions, NGOs or personal start-ups.
